USER CAUTIONS :

- These survey results should not be used for direct comparisons between, or rankings of, faculty. Many factors (including class size, class level, instructor gender, whether the class is required, and the students's class, expected grade, GPA, major, and gender) are known to bias survey responses. No attempt has been made to analyze for these factors.
- The enrollment for each course was captured at the time teacher evaluations were performed and may not match the final enrollment.
- The "Overall Rating" is taken as an average of the responses for question 11 (How would you rate the instructor's overall performance in this course?).

1. What are some positive characteristics or strengths of the course and/or instructor?

- ★★★★★ Superior
 - Dr. Snyder was interesting and always kept my attention in class lectures. He would always meet and talk with me about any worries about the class material when I randomly showed up at his office, which was quite often.
 - Dr. Snyder was very enthusiastic about his lectures. He is a very unique professor. I learned a lot from him in the class that I took under him. The most important thing to me in a teacher is that they make the material interesting and he did a good job of always being enthusiastic and showing that he really loved what he does.

 - Just weekly quizzes that you HAVE to study for.

 - Can not really think of any
 - We constantly jump from one topic to the next without finishing. It gets confusing.
 - contradicts what he says a lot
 - notes and study guides were had to go through and study
- ★★★★★ Good
 - He is very spacy in class-the notes he gives don't really tie in with his test materials. The quizzes are unrealistic even though he gives a few extra points here and there.
 - I do not feel like I learned as much in this class as I could have. I feel that we studied the same topics over and over.
 - The professor was very big on "professionalism" as far as the students were concerned. However, I feel he could have been more "professional" in class.
 - not enough exams and opportunities for students to do well; you fail one test and you are in trouble.

3. What specific changes would you like to see made in the course?
